

# Telephones for Emergency and Industrial Areas

**norphonic**  
Heavy Duty VoIP Telephones

## Innovation Never Stops

At Norphonic, we produce Heavy Duty VoIP Telephones for use in emergency and industrial areas.

Our vision is based on a unified and consistent approach to delivering products that can interface with other communication systems, thereby reducing costs and eliminating inefficiencies of using proprietary and non-reusable solutions.

We constantly ensure that we are at the forefront of developments to deliver the very best communication devices for voice, data and video.

## When Quality Matters

All aspects of our production is focused on quality and we adhere to all standards required when it comes to emergency, industrial and commercial communication applications. This means you can be reassured that the Norphonic Heavy Duty VoIP Telephone will work when it needs to.

## Flexible Industry Solutions

Norphonic Heavy Duty VoIP Telephones are sold as standard units, but our solutions can also be tailored to suit your individual needs. This flexibility means that our products are used in a range of markets, including:

- Transport (road, rail, air)
- Mining
- Energy production
- Utilities
- Manufacturing and construction
- Commercial (sports stadia, banking, retail)
- Local government... and more

***“We use Norphonic Heavy Duty VoIP Telephones in our Offshore Wind Turbines in the North Sea outside the United Kingdom, Sweden and Denmark. We are very happy with the product performance and with the excellent service and support”***

*“We use Norphonic Telephones  
for Emergency Roadside  
Communications in Norway.  
The products are very reliable  
and the service is outstanding”*

*Are Omdal, Project Director,  
Otera Norway*

## 10 Reasons to Choose Norphonic

1. Where environmental factors pose a problem for conventional telephones
2. Where emergency communication points are needed
3. Where public information points are needed
4. When reliability and up-time are critical goals
5. When central management and control are important
6. Where maintenance access is difficult
7. When compatibility to existing systems is important
8. When voice sound quality is important
9. When future-proofing is needed
10. When ease of installation is important

## Service – Here when you Need us

At Norphonic, we strive to deliver excellent service and customer support. We offer accreditation and installation training to our authorised partners, imparting best practice when it comes to installation and maintenance support. We also offer extended warranties and repair services on all our deliveries. Our key partners and direct customers can enjoy access to a 24 hour service hotline and we aim to respond to all other product support requests within 48 hours.
